

*We are convinced that first class medical devices and professional quality management permanently increase the quality of life. This is what we stand for.*

**axxos**  
brings quality to life

Would you like to join us on this mission?

To strengthen our current team of medical devices experts, we are looking for a

## **Senior Consultant Quality Management & Validation** (80-100%)

Two topics are your focus and responsibility:

- a) Establishing and implementing quality management systems for our customers - manufacturer and suppliers – according the MedTech Standards in Europe and US
- b) Develop and execute equipment qualifications and process validations with their required documentation (IQ, OQ, PQ).

Besides, you offer client-oriented and creative solutions within the given rules and regulations. You lead projects including time- and budget-management, and you enjoy to share your knowledge in virtual and face-to-face trainings with customers.

The skills and requirements needed for this diversified position:

- a) Extended experience in building and maintaining quality management systems according ISO 13485 and QSR
- b) Experience in equipment qualification and process validation
- c) Experience of validation of sterile packaging and their processes (sealing, sterilization, etc) is an asset
- d) Being fluent in written and spoken English and German is a must.

You will be in direct customer contact and will work independent and also in teams having the necessary social and interpersonal skills, rounds off the profile.

We are a multi-disciplinary, multi-cultural and self-motivated team of experts. Strong ethical values drive our professional and personal relationships. Axxos offers interesting projects from a wide variety of medical disciplines keeping you up-to-date with ample opportunities to learn and share. Last but not least, flexible working hours, above average salary and decent social security conditions are also included in this attractive offer.

For further information and/or to submit your application, please contact the head of the team Ms. Susanne Wyss-Lanz, directly. She is happy to assist ([s.wyss-lanz@axxos.ch](mailto:s.wyss-lanz@axxos.ch)).
